GEBERIT WC SYSTEM

PROFESSIONALS INSTALL **GEBERIT**

Geberit's concealed cistern and WC ceramic appliance go together optimally.

- Innovative installation techniques and easy maintenance mean that complete installation is **40 percent faster than with conventional cisterns and ceramic appliances.**
- By optimising flush geometry and hydraulics, flush performance is **up to 10 times better than the standard requirement.**

40 PERCENT FASTER INSTALLATION THAN CONVENTIONAL WC SYSTEMS

- Mostly tool-free installation
- Simple type EFF3 fastening
- Clever installation features

GEBERIT POWER & CONNECT BOX

The installation set simply clicks into place, making pre-installation and retrofitting of network connections much faster. It is invisible, multifunctional and the basis for a connected bathroom of the future.

GEBERIT FLUSH VALVE

The new type 212 flush valve is even easier to install and replace than the previous models, thanks to its slim and compact design.

TYPE EFF3 (EASY FAST FIX) FASTENING

Type EFF3 fastening technology makes installing Geberit WC ceramic appliances simple, fast and almost tool-free.

WC SEAT INSTALLED IN AN INSTANT

The WC seat is conveniently aligned and fixed from above without a template. In addition, the toggle plug for easy WC seat installation has been further developed to make removing it easy, too. It can be taken out completely without parts falling into the ceramic appliance. This makes installation even easier.

QUALITY CONNECTS

GEBERIT – QUALITY TO RELY ON

Benefit from an optimal installation experience in front of and behind the wall. Count on our reliable services, our spare parts availability and a WC system that can be easily maintained and upgraded to the very latest standards, even after decades.

ADVANTAGES OF THE GEBERIT SYSTEM

50

**YEARS OF
SPARE PARTS
AVAILABILITY**

On all replaceable mechanical parts of the concealed cistern, except for electronic product functions (e.g. DuoFresh).

DURABILITY

Easy to upgrade to the latest technical standards thanks to backward compatibility.

**RELIABLE
SERVICES**

Support with 29 fully equipped training centres, numerous technical advisors around the world and various support materials such as installation films, BIM data, catalogues/brochures.

**FULL
SYSTEM
APPROACH**

Geberit develops innovative solutions and products at the cutting edge of technology. The best performance is achieved when the individual elements work together as a system. Optimally coordinated, they meet the highest requirements of installation specialists and bathroom users.

QUALITY CONNECTS

GEBERIT – YOU CAN TRUST

Benefit from design flexibility for more individuality in your bathroom and from Geberit's commitment to the circular economy for saving natural resources.

ADVANTAGES OF THE GEBERIT SYSTEM

SMART BATHROOM

Easy to upgrade with the Geberit Power & Connect box for a networked bathroom of the future - e.g. for Geberit DuoFresh with LED orientation light or touchless flush actuation.

DESIGN FREEDOM

There is complete design freedom when it comes to choosing the right actuator plate. Discover the wide range of options at www.geberit-global.com/showroom

SUSTAINABILITY

Environmentally friendly, resource-saving, durable products and solutions are very important to Geberit. For example, our product combinations make an important contribution to the resource-saving use of water. Reducing the ecological footprint by minus 5% CO₂ intensity* per year is a clear goal.

Geberit Group has been awarded the highest platinum medal by EcoVadis for its sustainability management. This puts Geberit in the top 1% of all companies listed by EcoVadis. Find out more at www.geberit-global.com/sustainability

GEBERIT WC SYSTEM

SUPERIOR FLUSH PERFORMANCE

NEW

Geberit
Acanto WC

In combination with the Geberit cistern, the Geberit WC ceramic appliance provides superior flush performance that is up to 10 times better than the standard requirement.

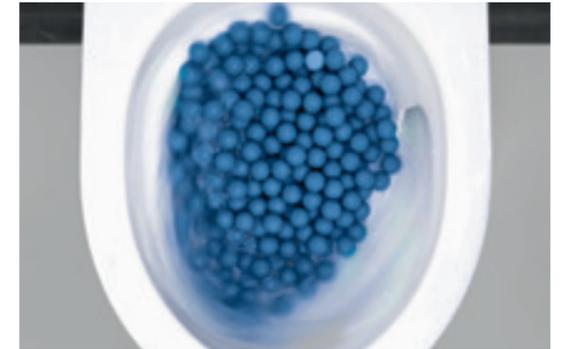

UP TO 10 TIMES BETTER FLUSH PERFORMANCE

BETTER FLUSH PERFORMANCE WITH GEBERIT TURBOFLUSH

Geberit develops WC systems that optimise the entire water circuit from the cistern to the WC and into the discharge pipe. The inner geometry of the Geberit WC ceramic appliance is designed to convert the energy of the cistern to allow the best possible flushing of the toilet. This guides the flush water through the rimless ceramic appliance in a powerful vortex. As it flows out, the water is controlled precisely, enabling a complete surface flush. Flushing-out performance is up to 10 times better than the specifications of international standards and is particularly quiet.

See for yourself at
www.geberit-global.com/wc-system

In trials with test balls, up to ten times more balls are flushed away than the standard testing (DIN EN 997-2018) requires.

Required flush performance according to the DIN EN 997:2018 standard

Geberit WC with TurboFlush performance is up to 10 times better than the standard

EASY-TO-CLEAN SURFACES

Flush- and spray-proof rimless Geberit WC ceramic appliances and the Geberit Quick-Release WC seat make it easy to clean.

SIMPLY MORE DESIGNS

Choose from a variety of designs, materials and colours to find the perfect actuator plate for your bathroom and style. The Sigma70 is a new actuator plate with a minimalist, floating look and an even wider range of colours, some with easy-to-clean coatings and in materials such as glass, stainless steel and PVD-coatings.
