THE GEBERIT WC SYSTEM

PROFESSIONALS INSTALL **GEBERIT**

Geberit's concealed cistern and WC ceramic appliance go together optimally.

- Innovative installation techniques and easy maintenance mean that **complete installation is 40 percent faster** than with conventional cisterns and ceramic appliances
- By optimising flush geometry and hydraulics, **flush performance is up to 10 times better than the standard requirement.**

40 PERCENT FASTER INSTALLATION THAN CONVENTIONAL WC SYSTEMS

- Mostly tool-free installation
- Simple type EFF3 fastening
- Clever installation devices

→ GEBERIT MASTERFIX

The Geberit MasterFix adapter makes installation tool-free and simple. In addition, overwind protection according to the tank cover principle ensures a reliable connection between the supply system and the concealed cistern.

← GEBERIT FLUSH VALVE

The new type 212 flush valve is even easier to install and replace than the previous models, thanks to its slim and compact design.

← TYPE EFF3 (EASY FAST FIX) FASTENING

Type EFF3 fastening technology makes installing Geberit WC ceramic appliances simple, fast and almost tool-free.

→ WC SEAT INSTALLED IN A HEARTBEAT

The WC seat is conveniently aligned and fixed from above without a template. In addition, the toggle plug for easy WC seat installation has been further developed to make removing it easy, too. It can be taken out completely without parts falling into the ceramic appliance. This makes installation even easier.

QUALITY CONNECTS

GEBERIT – QUALITY I CAN RELY ON

Offer your customers long-term warranties and reliable spare parts availability with Geberit. Your customers will receive a WC system that can be easily maintained and upgraded to the very latest standards, even after decades.

THE GEBERIT WC SYSTEM SUPERIOR FLUSH PERFORMANCE

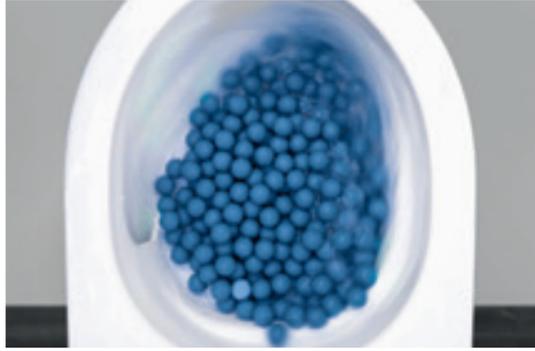

In combination with the Geberit cistern, the Geberit WC ceramic appliance provides superior flush performance that is up to 10 times better than the standard requirement.

BETTER FLUSH PERFORMANCE WITH GEBERIT

Geberit develops WC systems that optimise the entire water circuit from the cistern to the WC and into the discharge pipe. The inner geometry of the Geberit WC ceramic appliance is designed to convert the energy of the cistern to allow the best possible flushing of the toilet. This guides the flush water through the rimless ceramic appliance in a powerful vortex. As it flows out, the water is controlled precisely, enabling a complete surface flush. Flushing-out performance is up to 10 times better than the specifications of international standards and is particularly quiet.

See for yourself at www.geberit.xy/wc-system

UP TO 10 TIMES BETTER FLUSH PERFORMANCE

Flush performance is up to 10 times better than required by standard testing (DIN EN 997-2018).

Required flush performance according to the DIN EN 997:2018 standard

Geberit WC with TurboFlush: up to 10 times better than the standard

Flush- and spray-proof rimless Geberit WC ceramic appliances, the easy-to-remove seat and almost pore-free KeraTect® special glaze make cleaning the toilet a breeze.
